

I don't understand why all media systems can't work together to keep the public informed...well, perhaps the almighty dollar is more important. Weather and traffic updates are extremely helpful while traveling the highways of this country. Most of us are not equipped with television in our vehicles. Weather and traffic become very important during trips and I'm not sure why this information would be a problem to share with the public. We depend on XM radio to keep us updated.

I would ask you to reject NAB's petition 04-160 and keep the airways filled with needed information.

Thank you,
Patty Johnson
